

■

## Reference Section B

Prevalence of  
reported ESRD

**table b.1 · 267**  
**point prevalent counts of reported ESRD patients**  
*patients alive on December 31 of each year, by demographic characteristics & primary diagnosis*

**table b.2 · 268**  
**period prevalent counts of reported ESRD patients: all patients**  
*patients alive during the calendar year, by demographic characteristics & primary diagnosis*

**table b.3 · 269**  
**point prevalent counts of reported ESRD patients: U.S. only, with unknowns dropped**  
*patients alive on December 31 of each year, by demographic characteristics & primary diagnosis*

**table b.4 · 270**  
**point prevalent rates of reported ESRD, unadjusted**  
*per million population, patients alive on december 31 of each year, by demographic characteristics & primary diagnosis*

**table b.5 · 271**  
**point prevalent rates of reported ESRD, adjusted**  
*per million population, patients alive on December 31 of each year, by demographic characteristics*

**table b.6 · 272**  
**point prevalent counts of reported ESRD patients, by time period**  
*patients alive on december 31 of each year, by age, gender, & race*

**table b.7 · 273**  
**point prevalent rates of reported ESRD: 1996-1998 combined**  
*per million population, patients alive on December 31 of each year, by age, gender, & race*

**table b.8 · 273**  
**point prevalent rates of reported ESRD: 1999-2001 combined**  
*per million population, patients alive on December 31 of each year, by age, gender, & race*

**table b.9 · 274**  
**point prevalent counts of reported ESRD patients, by primary diagnosis**  
*1998-2001 combined, patients alive on December 31 of each year, by age, gender & race*

**table b.10 · 277**  
**point prevalent rates of reported ESRD, by primary diagnosis**  
*per ten million population, 1998-2001 combined, patients alive on December 31 of each year, by age, gender, & race*

**table b.11 · 280**  
**point prevalent counts of reported ESRD patients, by diabetic status & state/territory: all patients**  
*patients alive on December 31 of each year*

**table b.12 · 283**  
**point prevalent counts of reported ESRD patients, by diabetic status & state: u.s. only, with unknowns dropped**  
*patients alive on December 31 of each year*

**table b.13 · 286**  
**point prevalent rates of reported ESRD, by diabetic status & state**  
*per million population, patients alive on december 31 of each year, by age, gender, & race*

**table b.14 · 289**  
**point prevalent counts of reported ESRD patients, by diabetic status & ESRD network: all patients**  
*all patients alive on December 31 of each year*

**table b.15 · 290**  
**point prevalent counts of reported ESRD patients, by diabetic status & ESRD network: u.s. only, with unknowns dropped**  
*patients alive on December 31 of each year*

**table b.16 · 291**  
**point prevalent rates of reported ESRD, by diabetic status & esrd network**  
*per million population, patients alive on December 31 of each year*

Table B.1

**Point Prevalent Counts of Reported ESRD Patients**

patients alive on December 31 of each year, by demographic characteristics &amp; primary diagnosis

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

†CMS began collecting Hispanic ethnicity data in April 1995; cells for years prior to 1996 have therefore been left blank.

On our website: 2001 Point Prevalent Counts of Reported ESRD Patients (B.b) &amp; Percent Decrease in Counts of Reported Point Prevalent ESRD Patients (B.c).

Table B.4

**Point Prevalent Rates of Reported ESRD, Unadjusted**

per million population, patients alive on December 31 of each year, by demographic characteristics & primary diagnosis

Rates by age are adjusted for gender &amp; race, rates by gender are adjusted for age &amp; race, rates by race are adjusted for age &amp; gender, and rates by primary diagnoses are adjusted for age, gender, &amp; race.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

†CMS began collecting Hispanic ethnicity data in April 1995; cells for years prior to 1996 have therefore been left blank.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed.

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, and rates by primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed. " ." Zero values in this cell.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed. "Zero values in this cell."

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, and rates by primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed. "." Zero values in this cell.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule. U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

\*Values for cells with fewer than 10 patients are suppressed.

Table B.12 (continued)

**Point Prevalent Counts of Reported ESRD Patients, by Diabetic Status & State: U.S. Only, with Unknowns Dropped**

patients alive on December 31 of each year

Rates are adjusted by age, gender, &amp; race.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.

Rates are adjusted by age, gender, &amp; race.

The point prevalent cohorts are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

U.S. only; patients of unknown age or gender, or of other or unknown race, are excluded so that rates can be calculated properly.
