

Table of Contents

Section B: Prevalence of Reported ESRD

- B.1 Point Prevalent Counts of Reported ESRD Patients
Patients Alive on December 31 of Each Year, by Demographic Characteristics & Primary Diagnosis
- B.2 Period Prevalent Counts of Reported ESRD Patients: All Patients
Patients Alive During the Calendar Year, by Demographic Characteristics & Primary Diagnosis
- B.4 Point Prevalent Rates of Reported ESRD, Unadjusted
Per Million Population, Patients Alive on December 31 of Each Year, by Demographic Characteristics & Primary Diagnosis
- B.11 Point Prevalent Counts of Reported ESRD Patients, by Diabetic Status & State/Territory: All Patients
Patients Alive on December 31 of Each Year
- B.13 Point Prevalent Rates of Reported ESRD: by Diabetic Status & State
Per Million Population, Patients Alive on December 31 of Each Year
- B.14 Point Prevalent Counts of Reported ESRD Patients, by Diabetic Status & ESRD Network: All Patients
Patients Alive on December 31 of Each Year
- B.16 Point Prevalent Rates of Reported ESRD: by Diabetic Status & ESRD Network
Patients Alive on December 31 of Each Year

Table B.1
Point Prevalent Counts of Reported ESRD Patients
patients alive on December 31 of each year; by demographic characteristics & primary diagnosis

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

*Values for cells with fewer than 10 patients are suppressed.

." Zero values in this cell.

The period prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the period prevalent patient is determined as of December 31 of the selected calendar year.

*Values for cells with fewer than 10 patients are suppressed.

." Zero values in this cell.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

The age of the point prevalent patient is determined as of December 31 of the selected calendar year.

U.S. only; patients of unknown age or gender, or of other or unknown race are excluded so that rates can be calculated properly.

†CMS began collecting Hispanic ethnicity data in April 1995; cells for years prior to 1996 have therefore been left blank.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

*Values for cells with fewer than 10 patients are suppressed.

." Zero values in this cell.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

*Values for cells with fewer than 10 patients are suppressed.

." Zero values in this cell.

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, & primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule. U.S. only; patients of unknown age or gender, or of other or unknown race are excluded so that rates can be calculated properly.

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, & primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

U.S. only; patients of unknown age or gender, or of other or unknown race are excluded so that rates can be calculated properly.

Standard Errors

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, & primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts & associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule.

U.S. only; patients of unknown age or gender, or of other or unknown race are excluded so that rates can be calculated properly.

Rates by age are adjusted for gender & race, rates by gender are adjusted for age & race, rates by race are adjusted for age & gender, & primary diagnoses are adjusted for age, gender, & race.

The point prevalent cohorts and associated modalities are determined on December 31 of each calendar year without applying the 60-day stable modality rule. U.S. only; unknown age, gender, & race; other & unknown are excluded so that values can be calculated appropriately.
