Funding

The 26th Annual Data Report (ADR) of the United States Renal Data System (USRDS) was produced by the USRDS Coordinating Center, and was funded solely with federal funds from the National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, U.S. Department of Health and Human Services, under contract HHSN276201400001C with the University of Michigan Kidney Epidemiology and Cost Center (UM-KECC) in partnership with Arbor Research Collaborative for Health. Both organizations have enacted conflict of interest (COI) policies and practices governing the conduct of research within the USRDS and of other research not related to the USRDS. In addition to internal controls, USRDS work is overseen by NIDDK Project Officers, the USRDS Steering Committee, and the USRDS External Expert Panel. Listed here are those who contributed to the 2014 ADR. Unless otherwise noted, the contributor’s employer was the University of Michigan or Arbor Research Collaborative for Health.
